DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1, 6, 9-14, 18 and 28-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the condition (h) is not part of the conditions, which satisfies the claimed invention. Also, the condition (f) is missing in the claim.

In claim 6, the transition temperature ($T(N^*, BP)$) is vague because the transition from the nematic phase or the cholesteric phase into the isotropic phase ($T(N, I)$ or $T(N^*, I)$) is only disclosed in the specification (see page 8, lines 1-3).

In claims 9-10, the formulae (I) and (II) are not defined.

In claim 18, the condition (d) is not clearly defined. It is not clear that the condition (d) is independent from the condition (a).

In claim 28, the formula "II" does not have an antecedent basis.

In claims 29-30, the formula I and/or formula II are not defined.

Claims 11-14 are rejected because they are dependent claims.

2. Claims 15-17 provide for the use of "light modulation element" and "electro-optical display", but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 15-17 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 18 and 23-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Heppke et al. (US 4,767,194).

The reference discloses that the liquid crystal phase envisaged according to the reference ("blue phase") arises if certain chiral systems are warmed from the cholesteric phase (see col. 2, line 66 to col. 3, line 2). The reference's teaching anticipates the condition (d) of the present invention. The examples 1 and 2 have the claimed temperature range.

Allowable Subject Matter

5. Claims 2-5, 7-8, 19-22 and 25-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 10:30 AM to 7:00 PM.
